European	26 x 26 in.
German	31 x 31 in.

# Choosing Your Down Comforter

## STEP 1. Choose your fabric.

All DeWoolfson comforters are made with fabric supplied by the same German or Austrian suppliers on whom DeWoolfson has relied for the world's finest, most durable and trusted downproof fabrics for nearly four decades. And, each fabric is different. Our saying is that a great comforter provides "warmth without weight." So, if you agree, choose a lighter fabric for a very delicate warmth.

## STEP 2. Choose your warmth level.

If you are unsure of what warmth level is best for you, choose one weight lighter than what you think you need. DeWoolfson will gladly add additional down fill to your comforter any time up to one year from the date of purchase, charging only for additional down added. We cannot remove down from the baffled box construction.

FLORIDA LIGHT  
Bedroom 70 or ↑

SOUTHERN LIGHT  
Bedroom 65 to 69

CAROLINA PIEDMONT  
Bedrooms 59 to 64

MOUNTAIN AIR  
Bedrooms 50 to 58

CANADIAN WINTER\*  
Bedrooms 49 or ↓

## STEP 3. Choose your down by fill power.

Comforters can be made warmer either by adding more ounces of fill, or by using a higher fill power down. Fill power is the measurement of the ability of 1 ounce of down to loft and trap air. For example, 1 ounce of 650 down will fill a volume of 650 cu. in. A 750 fill power down is about 15% warmer than one with 650 fill power in the same number of ounces. So if you believe that the joy of a down comforter is "warmth without weight," then choose one made from a lighter fabric and a higher fill power down. We use only responsibly sourced, all European large cluster white goose down that is washed, sorted and tested in the USA. Please allow 1 to 3 business days for your comforter to be filled, finished and shipped from our North Carolina plant.

## STEP 4. Consult this chart to help make your choice.

Comforter fabrics, warmth levels and available fills

# Cambric COMFORTER

This is our most popular comforter – made with the same densely woven, German-engineered downproof fabric that we have used and trusted for over 35 years. It is one of the most widely used downproof cambric cotton fabrics in Germany and throughout Europe.

# Batiste COMFORTER

If a down comforter means “warmth without weight” then this is surely one of the finest down comforters we can make. The lightweight, German-engineered batiste fabric is woven from specialized yarns, resulting in one of the world’s lightest downproof fabrics, weighing over one-third less than our other down-proof fabrics. Its a fabric that DEWOOLFSON has been using for over 30 years, and is proven in its durability.

- The perfect fabric for medium and heavier weight comforters.

☼ For the fill weight in ounces of down for each item please see our website.

Our customers describe the cotton sateen fabric on this comforter as “warm and supple,” and “so soft it allows the down to drape around you, conforming to your body and enveloping you in warmth!” It is made with a German-engineered downproof fabric in a sateen weave.

# Austrian Cambric COMFORTER

The fabric covering this comforter is woven in Austria by a mill experienced in producing downproof fabrics for over 100 years. This very special downproof fabric has an invisible aloe vera finish that is anti-microbial and prevents yellowing and retards aging.

# Austrian Tencel™ Batiste COMFORTER

Our Austrian Tencel™ Batiste down comforter is DEWOOLFSON's finest. The fabric is a tightly woven blend of cotton and natural Tencel™ lyocell yarns woven in Austria by a mill experienced in producing downproof textiles for over 100 years. This unique blend of fibers feels very much like silk. The Tencel™ yarns are a natural cellulose fiber made from beechwood that absorbs body humidity at night and quickly releases it in the morning. Austrian Tencel™ Batiste comforters are filled with our exceptional – and rare – responsibly sourced, all European 900 fill power white goose down.

Carolina Piedmont weight shown

- 55% cotton and 45% lyocell LuxeTencel™.
- Our lightest downproof fabric weighing only 72 g/m<sup>2</sup>.
- Invisible antimicrobial natural aloe vera fabric finish that also protects and preserves comforter fabric.

# Organic Cotton Batiste COMFORTER

This eco-friendly comforter is made from German-engineered, 100% organically cultivated cotton AND, as an assurance, each item meets strict international standards for the ecologically safe and healthful production of yarn and textiles. That means no harmful chemicals are used in the production or finishing process. This fabric is an exceptionally light Batiste weave . . . important in making a comforter that has "warmth without weight." Each of our Organic Cotton comforters will be filled with responsibly sourced, all European white goose down in your choice of hand-selected 650, 750 or 850 fill-power!

# *Daunendecke* EUROPEAN SIZE COMFORTER

Be daring and sleep like many European families still do! So many of our American customers have returned from visits to Germany, Switzerland and Austria and asked for a down comforter just like the one they slept under there. This is the authentic Euro-sized *Daunendecke* - right down to the size, fabric and down fill.

- 54 x 78" - (approximately 135 cm x 200 cm) smaller than an American twin size.

☼ For the fill weight in ounces of down for each item please see our website.

# Our Commitment

**Our Fabrics.** We began by searching the world for the highest quality downproof fabrics. Over time we developed close ties to textile firms in Germany and Austria that have now been producing these specialized fabrics for well over a century. To this day, the same firms continue to supply us with materials that we have come to trust and our customers have proven through use . . . although some have a new twist, such as organic cotton, natural lyocell, and ever-so-light Batiste weaves. Every fabric meets international standards for minimizing ecological impact in production and to be free from harmful chemicals. Our comforters and pillows have no fancy names; most are simply identified by their outer fabric shell.

**Our Down Fills.** You have our promise to use only responsibly sourced, all-European down and feather fill that has been washed, sorted and tested in the USA. We believe that down products should never be vacuum packed, never be packed in containers for a long trip to the U.S., and never be stored in a warehouse. Down should be fresh to preserve its loft. And customers should have their choice of fills and warmth levels. So at DeWoolfson, each customer's comforter, pillow or featherbed is filled at the time of order, with state-of-the-art equipment capable of weighing down to a hundredth of an ounce!

**Our Adjustable Pillows.** We are reminded of that old family doctor's advice . . . "Take 2 at bedtime and call me in the morning." That's what we tell our customers. No one should purchase a pillow that isn't just the right firmness. So if your DeWoolfson pillow isn't exactly perfect we'll adjust the firmness for you. Ask your sales person for details about this service . . . for which we've become so well known.

Richard Schaffer  
Co-founder, CEO

Marsha Turner  
Co-founder, CFO

**Our Team.** Every member of the DeWoolfson family, whether a sewing machine operator, filling operator, quality inspector, sales and customer service representative, or down specialist is committed to bringing you the finest down products that our years of experience have taught us.

*Since 1983*
